Call for Papers

AI, ML and LLMs (AIMLL) Workshop

The 23rd International Conference on Wireless Communications and Mobile Computing

Website: http://iwcmc.org/2027/

Submission Link: **https://conferences.sparcly.ai/IWCMC2027**

Technically Sponsored by IEEE

June 13-17, 2027, Barcelona, Spain

Chairs:

Jun Wu, Shanghai Jiao Tong University, China, junwuhn@sjtu.edu.cn

Ali Kashif Bashir, Manchester Metropolitan University, UK, a.bashir@mmu.ac.uk

Qianqian Pan, the University of Tokyo, panqianqian@g.ecc.u-tokyo.ac.jp

Di Zhang, Sun Yat-sen University, China, zhangd263@mail.sysu.edu.cn

Mohsen Guizani, MBZUAI, UAE, mohsen.guizani@mbzuai.ac.ae

Scope

Artificial intelligence (AI), machine learning (ML), and Large Language Models (LLMs) have demonstrated remarkable capabilities across a wide range of domains and applications, including smart city applications, natural language processing, human-AI interaction, computer version, and digital twin data analysis, fueling a new wave of progress in artificial intelligence in next generation systems. But these systems are vulnerable to many challenges such as security threats, open source platforms, etc. Therefore, ensuring the security, integrity, and accountability of AI, ML, and LLMs throughout their development, deployment, and usage has become a central issue in multiple domains for both technological research and societal governance. This workshop aims to bring together researchers to explore theoretical models, empirical assessments, and practical defenses for AI/ML and LLMs, fostering rapid development and wide applications of LLMs in multiple application domains.

Topics

Accepted papers will be published in the IEEE IWCMC 2026 proceedings and will be submitted to the IEEE digital library (IEEE Xplore). Authors are welcome to submit original papers (not published before and/or simultaneously to another venue) with topics that include but are not limited to:

- Distributed learning for AI/ML and LLMs
- Privacy preserving of AI/ML and LLMs
- Security analysis for AI/ML and LLMs
- LLMs hallucinations detection and mitigation
- AI/ML and LLMs software and hardware
- Copyright protection of AI/ML and LLMs
- Quantum for AI/ML and LLMs
- Cross-layer platforms for AI/ML and LLMs
- Digital twin for AI/ML and LLMs
- Data poisoning and defense for AI/ML and LLMs

- Reliability of AI/ML and LLMs
- AI/ML and LLMs driven cybersecurity enhancements
- Novel and potential applications of AI/ML and LLMs

Submitted papers are encouraged to address novel technical challenges or industrial and standard aspects of the key technologies for sustainable and secure cognitive buildings/cities.

NB: All accepted and presented Workshop papers will appear under the main conference list in IEEE Xplore.

Important Dates

Same deadlines as the main conference dates.

Note: Within this workshop, there will be one Best Paper Award.
